

DH4093/8093 iPhone connection SOP

*The mobile viewer only can support iPhone OS v2.2 or above.

Step 1: Please enter "App Store" on iPhone.

Step 2: Please use "search"  function then type "SuperCam" to search the application.

Step 3: Click "SuperCam" then you can see the screen as the following(left-hand side). Click "FREE" you can see it change to "INSTALL". Please click "INSTALL" to start install the application.

Step 4: The iPhone will ask your password on iTunes Store. (Please register a ID iTunes Store first) Click “OK” to next step.

You can see “Loading...” on the screen. After the application installed, you can see an ICON named “SuperCam”. Please Click “SuperCam” to start program.

Step 5: Select “System setting”.

Step 6: Please fill in “DVR IP Address”, ”Name” and “Password”.

Step 7: Come back to previous page, click “Live View” to connect DVR. If the connection is fine, you can see channel 1 live on the screen.

Step 8: If you connect a speed dome on DVR, you can also control it via iPhone. Also you can do “Snapshot” and “Switch Channel” on iPhone.
